Skilled in troubleshooting, automation (PowerShell/Bash), and providing reliable system and network support. Passionate about infrastructure, virtualization, and enterprise networking.

SKILLS

- Networking: Cisco Packet Tracer, VLANs, DHCP, DNS, Routing & Switching, Network Troubleshooting
 - Systems: Windows Server, Active Directory, Linux (RHEL/Arch), VMware Workstation
 - Scripting: PowerShell, Bash
 - Tools: Wireshark, GLPI, Spiceworks, Git
 - Programming: Java, PHP, SQL, JavaScript
 - Communication: Technical documentation, teamwork, and client support
-

EDUCATION

Diploma in Computer Systems Technician – Networking
Algonquin College, Ottawa, ON | Expected 2027

Key Courses: Networking Essentials, Windows Server, Linux Administration, Cisco Routing & Switching, Technical Support, Scripting, Network Security

EXPERIENCE

Chef / Kitchen Team Lead
Pita Bell Kabab

2017 – 2019

- Managed kitchen operations, coordinated staff, and ensured timely meal preparation during peak hours.
 - Oversaw food quality, safety, and cleanliness standards in compliance with health regulations.
 - Trained and supervised staff, demonstrating leadership and accountability.
 - Strengthened teamwork, multitasking, and time-management abilities in a high-pressure environment.
-

PROJECTS

Networking Configuration (Apr 2025 – Aug 2025)

Configured routers, switches, VLANs, DHCP/DNS, and firewall rules in Cisco Packet Tracer to simulate enterprise networks

Routing & Switching Configurations (Sep 2025 – Oct 2025)

Simulated multi-device networks implementing VLANs, static/dynamic routing, and network troubleshooting in Cisco Packet Tracer.

Linux System Automation (Apr 2025 – Aug 2025)

Automated user management and backups using Bash scripting to improve efficiency and reliability.

PowerShell User Management (Apr 2025 – Aug 2025)

Developed PowerShell scripts for bulk account creation and permissions, reducing setup time by 70%.
