PROFILE

Computer Systems Technician – Networking student with hands-on enterprise IT support experience. Skilled in troubleshooting hardware, software, printers, mobile devices, and Windows/Linux environments. Strong background in networking, Active Directory, enterprise support, and customer service, with experience supporting users in a professional business environment.

SKILLS

Networking: IPv4/IPv6 addressing, subnetting, VLANs, trunking, STP, ROAS, OSPFv2, standard/extended ACLs, NAT/PAT, static port forwarding, DHCP Snooping, Cisco IOS, syslog/NTP/TFTP workflows, CLI troubleshooting

Windows Server & Messaging: Windows Server 2019/2022, AD DS, DNS, DHCP, Group Policy, IIS, WDS, AD CS, RSAT, Exchange Server 2019, OWA, SMTP/POP/IMAP validation, Azure VM, Azure Storage, Key Vault/RBAC concepts

Linux & Services: RHEL, Arch Linux, systemd, journald, SSH hardening, iptables, BIND DNS, Apache virtual hosts/SSL, Postfix, LDAP, Samba, NFS, SELinux basics

Virtualization, Containers & Hardware: VMware Workstation Pro, multi-VM labs, Podman, Podman Compose, OCI images, BIOS/UEFI, POST troubleshooting, RAID validation, desktop teardown/rebuild, driver troubleshooting

Scripting & Tools: PowerShell, Bash, Git/GitHub, Wireshark, TFTP64, nmap, OpenVAS, GLPI, Spiceworks

Programming (Academic Exposure): Java, PHP, SQL, HTML/JavaScript

EDUCATION

Diploma in Computer Systems Technician – Networking

Algonquin College, Ottawa, ON | Expected 2027

Key Courses: Networking Essentials, Windows Server, Linux Administration, Cisco Routing & Switching, Technical Support, Scripting, Network Security

CERTIFICATIONS

- **Cisco Networking Academy** – CCNA: Switching, Routing, and Wireless Essentials (Jan 2026)
 - **Cisco Networking Academy** – Introduction to Packet Tracer (May 2024)
 - **IBM SkillsBuild** – Getting Started with Generative AI (Jun 2026)
-

EXPERIENCE

IT Support Coordinator (Student)
TCG Services Ltd. / Taggart Group of Companies

May 2026 – Present

- Deliver in-person and remote IT support to end users.
- Configure and deploy laptops, mobile devices, and peripherals.
- Troubleshoot hardware, software, printer, and network issues.
- Manage service desk tickets and support asset management activities.

Baker / Shift Supervisor
Kettlemans Bagel

2022 – 2024

- Prepared fresh bagels and bakery products daily while maintaining quality and consistency.
- Supervised and trained team members, coordinated shifts, and ensured smooth daily operations.
- Managed customer service during busy periods, handling transactions and resolving issues efficiently.
- Reinforced teamwork, time management, and accountability in a fast-paced environment.

Chef / Kitchen Team Lead
Pita Bell Kabab

2017 – 2019

- Managed kitchen operations, coordinated staff, and ensured timely meal preparation during peak hours.
- Oversaw food quality, safety, and cleanliness standards in compliance with health regulations.
- Trained and supervised staff, demonstrating leadership and accountability.
- Strengthened teamwork, multitasking, and time-management abilities in a high-pressure environment.

PROJECTS

Enterprise Networking Labs | GitHub: github.com/Mustafa22J/Enterprise_Networking_Labs

Configured and documented Cisco enterprise networking labs covering OSPFv2, standard/extended ACLs, NAT/PAT, static port forwarding, syslog, NTP, TFTP workflows, ACL audit fixes, and troubleshooting challenges. Validated configurations using IOS show commands, route checks, access-list hit counters, syslog evidence, and topology-based testing.

Windows Domain & Exchange Administration | GitHub: github.com/Mustafa22J/windows-domain-admin-labs

Designed and deployed Windows Server 2022 environments including AD DS, DNS, DHCP, Group Policy, IIS, WDS, AD CS, and Exchange Server 2019. Configured mailbox databases, SMTP services, MX/Autodiscover DNS records, OWA access, and restricted-user GPO lockdown policies.

Linux Server Administration & Network Services | GitHub: github.com/Mustafa22J/Linux-server-admin-containers-labs

Configured Linux server and container labs using RHEL/Arch, Podman, systemd, journald, SELinux basics, Paperless-ngx, and backup automation. Documented Linux network services including SSH hardening, iptables firewall rules, BIND DNS, Apache, Postfix, LDAP, Samba, and NFS.

PC Enterprise Hardware Diagnostics | GitHub: github.com/Mustafa22J/PC-Enterprise-Hardware-Diagnostics

Documented PC troubleshooting case studies covering BIOS/UEFI misconfigurations, POST and boot-chain diagnosis, RAID setup validation, Windows access recovery, DHCP/network service issues, chipset/driver problems, and ESD-safe teardown/rebuild workflows.
